PUBLIC ROADS

A JOURNAL OF HIGHWAY RESEARCH

UNITED STATES DEPARTMENT OF AGRICULTURE
BUREAU OF PUBLIC ROADS

INDEX
TO VOLUME 12

MARCH 1931-FEBRUARY 1932

ENTRIES APPEAR IN THIS INDEX

under names (1) of authors, (2) of research organizations or institutions, and (3) of subjects.

Cross references may be made (1) to allied main headings or (2) to subheadings of main headings. In the latter case, subheadings are indicated in cross references by inclosure in parentheses. Headings and subheadings consisting of several words each may be indicated in cross references by initial words only.

Abbreviations used in this index are the following:

a.—article(s) or report(s) by or concerning.
collab.—collaborator.
(fn)—footnote(s).
r.—reference(s), referred to.
r. to p.—reference(s) to publication(s) by or concerning.
v.—versus.
Headings repeated in subheadings.

LIST OF AUTHORS

(For titles of articles, see under names of individual authors in the body of the index)

AARON, HENRY
ABBOT, L. A.
ANDERSON, ANDREW P.
BUCHANAN, JAMES A.
DAVIS, G. W.
HOGENTOGLER, C. A.
JACKSON, F. H.
JOHNSTON, C. M.
JONES, H. C.
KELLERMANN, W. F.
KELLY, H. H.
LORD, Dr. E. C. E.
MANSON, PHILIP W.
MILLER, DALTON G.
NORMANN, O. K.
REAGEL, F. V.
ROBESON, F. A.
TARWATER, E. L.
TELLER, L. W.
THEE, T. C.
THOREEN, R. C.
WATKINS, W. I.
WILLIS, E. A.
WILLIS, T. F.
WINTERMYER, A. M.

INDEX TO PUBLIC ROADS, VOLUME 12

A

Page

Aaron, Henry (collab.):
oil-treated earth roads in Missouri, a 49-63
r. to p 108
soil profile and subgrade survey, a 181-194
Abbot, L. A.: 1930 motor vehicle registrations and receipts, a 18-20
Absorption:
oil absorption by soils 51, 54-63
tar absorption—
by concrete 109-112, 115, 116
by soils 221, 225, 226, 228, 235
water absorption, moisture absorption—
by aggregates 39, 146, 159, 238, 239
by concrete 64, 66-68, 76-85, 152, 175, 237, 262, 263
by forms as affecting pressures exerted by concrete 15
by soils 63, 98-102, 105, 129, 138-140, 144, 181, 182, 192
see also Heaving.
Accelerations of motor-bus wheels, impact test data 21, 24-26
Accelerometers 25, 32
Accidents, motor vehicle, in California 48
Accumulation data (soil), grain-size determinations 117, 119, 120, 136, 200-202, 210-215
Acidity of soils, acidity test 190
Adhesion, *see* Soils (sticky soils).
Admixtures:
in concrete 64, 65, 67, 68, 73-76, 83-85
in oil-treated roads 61, 62
in subgrade soils 61, 62, 105, 107, 119-121, 124, 127-129, 131-135, 140, 143
Adobe structure of soils 181, 189
Age-elasticity relations of concrete bridge slabs 237, 246, 247, 259, 261
Age-strength relations of concrete 38, 39, 64-85, 109-116, 150-166, 170, 171, 176-180, 195, 196, 237, 241-252, 255, 259, 261, 270, 272-280, 290-292, 303
Aggregates, mineral:
Highway Research Board report, r 267
measuring in separate sizes 145, 147, 238, 275, 281, 282, 284-290, 292
quantities, sizes, types, gradings used and effects observed—
in bituminous mixtures 95, 216-235
in concrete ..... 11, 13, 37, 39, 46, 64, 83 (fn), 109, 145-180, 195, 237-266, 269-292
see also Proportioning.
Air content of soils 59, 93, 99, 126
Air curing of concrete as affecting its resistance to sulphate water action 64, 69-85, 109-116
Air hammer, use in placing of concrete 237-266
Air pressure, *see* Pressure.
Air resistance studies, r 268
Air temperatures, *see* Temperature.
Alexander, L. T. (collab.), r. to p 116, 117
Alkagel A 67, 74, 83
Alkali as soil constituent 182, 185, 190
Alkali resistance of concrete 64-85, 109-116
Allison, R. V. (collab.), r. to p 188
Alumina, aluminum:
as constituents of—
admixtures used in concrete 68
soils 181, 182, 185, 190, 217
American Association of State Highway Officials:
flexure tests of concrete 37-46
Ammonia as dispersing agent in soil analysis 117
Analyses, *see* Bituminous materials—Hydrometer—Mechanical analyses—Sulphate water—Wash test.
Anderson, Andrew P.:
drilling and blasting in highway grading, a 293-302, 308
modulus of rupture of frozen concrete beams, a 195-196
Anderson, M. S. (collab.), r. to p 188
Apparatus, *see* names of kinds of apparatus; *also* names of tests and of processes in which apparatus is used.
Appian Way 1
Argentina, roads and automotive vehicles 3, 4, 9, 17
Arkansas projects, study of 27E concrete paver 269-271, 275-277, 279, 280, 289, 292
Ash (powdered fuel, volcanic) as concrete admixture 67, 68, 74, 75, 84, 85
Asphalts and asphaltic products, use 17, 49-63, 217-235
Atterberg, Albert ..... 104 (fn), 105, 116
Austria, toll roads in 3
Automobiles, *see* headings beginning Motor.
Autostrade, Italy 2, 3, 7-10

B

Page

Barium chloride as concrete admixture 67, 75, 83
Barium sulphate, properties 141, 142, 144
Barnsdall Admix, use 67, 76, 83
Base courses:
crack ratios 268
sand-clay and marl bases, bituminous treatments 217-235
soil penetration into 93, 94, 99, 105
soil properties affecting performance of 105, 118, 128, 140, 142, 144, 220, 232, 235
Bases, exchangeable, as soil constituents 182
Batcher plants, paving plants 147, 280-289, 292
Bates road tests 16
Bear Mountain Bridge Road, New York 6
Bearing value of soils:
comparative b. v., test 92, 93
factors affecting b. v. and stability 51, 55-58, 63, 89-108, 117-144, 181-194, 217, 220, 235, 268
formulas and computations 95-98
Bedding courses for brick pavements 267
Belt lines, Washington (D. C.) area 216
Bending moments, concrete beams 303, 305
Bending tests, *see* Flexural—Flexure.
Bennett, H. H., r. to p 188
Bentonite as soil constituent 107, 116, 119-121, 124, 127, 135, 142
Bibliographies:
pressure of concrete against forms ..... 11 (fn)
soils, subgrades 108, 116, 188
toll roads 10
Binders, binding materials:
binding properties of soils 105, 108, 119, 120, 129, 134-136, 138, 139, 144, 197, 217, 219, 220, 228, 235
see also Cohesion—Soils (sticky soils).
bituminous binders, bituminous treatment of roads 49-63, 95, 138, 140, 143, 216-235
Bituminous materials:
analyses 50, 218, 219
see also Bituminous treatment.
Bituminous pavements, bituminous mats 3-8, 16, 17, 49-63, 102, 118, 216-235
Bituminous treatment:
of concrete as protection against alkali 64, 67, 68, 73, 75, 76, 82, 84, 85, 109-116
of roads—
costs 216, 222, 224-226, 228, 229, 231, 232
in South Carolina 217-235
oil treatment 49-63, 184
see also Bituminous pavements.
of subgrade soils 61, 62, 108, 119, 134, 135, 138, 140, 143, 184
Blasting in highway grading 293-302, 308
Block pavement construction 16
Bond:
in macadam pavements 99, 105
see also Binders—Bond strength.
Bond payments, road 18, 20, 86, 236
Bond strength of embedded steel reinforcement of concrete 237, 238, 251-256
Borings (soil), depth and spacing 184, 187, 188
Bouyoucos, G. J., r., r. to p 116, 198, 200, 201
Boyd, J. R., r. to p 108
Brazil, roads in 3, 17
Breaking machines, concrete beam:
type, effect on modulus of rupture of concrete 303-308
types used in various tests ..... 38, 40, 150-152, 195, 241, 243, 256, 257, 270, 271, 290, 303-308; front cover of No. 10
Brick pavements 16, 140, 267
Bridges, highway:
concrete bridge floor slabs, investigation 237-266
Highway Research Board research (steel bridges, wooden bridges) 268
movable bridges, electrical equipment for, r. to p 266
span lengths 237
tests, motion picture of 16
toll bridges 4, 6, 7, 9, 10
Briquet strength of cement, relation to strength of concrete 290-292
Brownian movements of suspended soil particles 105
Buchanan, James A.:
impact reactions, motor bus, a 21-36
Bulking of soils 181, 182, 189
Burlap curing of concrete, r 37, 148, 149, 195, 240, 241, 247, 270, 303
Busses, motor, *see* Motor busses.
Byers, H. G. (collab.), r. to p 188

C

Page

Cal as concrete admixture 67, 68, 74, 84
Calcium, calcium compounds, as soil constituents 182, 190, 192, 217
Calcium chloride as concrete admixture 67, 68, 74, 84
California highways 4, 16, 116
see also Accidents—Federal-aid.
Cantilever beam tests of concrete 195, 270-280, 290-292, 303-308
Capillarity of soils 51, 58, 89, 98, 100-105, 107, 108, 116, 117, 120, 122-125, 128, 129, 137, 139, 141, 143, 181, 183, 217, 220, 231, 232
Carborundum, addition to cement:
effect upon alkali resistance of concrete 66, 77-80
Celite 67, 68, 75, 84, 119, 239
Cement, cements:
as affected by curing conditions 65-68
handling (bulk cement, sack cement) 145, 147, 269, 282, 285-288
hot cement 267
strength, relation to strength of concrete 290-292
types and characteristics—
as affecting alkali resistance of concrete 64-85
high early strengtn cements, special cements, use 47, 64-85, 290
of cements used in test concretes 37, 39, 64, 66, 109, 145, 149, 238, 290, 291
see also other headings beginning Cement.
Cement-clay subbases, crack ratio 268
Cement contents and cement factors in concrete:
limitation of cement content 47
values in test concretes, effects observed 64, 109-116, 145, 152-180, 239, 246-248, 269-284, 288, 290-292
see also Proportioning—Water-cement ratio.
Cementation of soils 182, 184, 185, 188-190, 192
Cementing value of South Carolina marl 217
Central Highway (United States) 6
Centrifuge moisture equivalent tests of soils:
apparatus and procedure 204, 205, 268
data concerning various soils 56, 119-121, 127-129, 131-144, 192, 194, 197, 220
Chalk, properties 140
Chemical and colloidal constituents of soils:
determination 119, 120, 185
miscellaneous data 56, 105, 119-129, 134, 135, 137-144, 181-185, 188-190, 192, 194, 202, 211, 213, 217
Chile, roads in 17
Clays and clayey soils:
characteristics and their influence upon soil behavior 53-58, 61-63, 93, 95-99, 102, 104, 105, 107, 108, 116, 119-131, 134-144, 181-185, 188, 189, 192, 194, 220, 221, 235
clay content of various soils 56, 105, 107, 117, 119, 131, 133-144, 188, 189, 192, 194, 220
clay pan 181, 189
grain size and significance of 56, 105, 107, 117, 119, 120, 188, 197, 200-202, 208-215
oil treatment (clay roads) 53-57, 62, 63
see also Sand-clay—Soils.
Climatic conditions, *see* Weather.
Clods, cloddy soils 99, 181, 188, 189, 192, 194
Cohesion and lack of cohesion in soils, effects 51, 56, 57, 59-61, 63, 89, 95-99, 101, 102, 104, 105, 107, 108, 117, 121-124, 129, 134, 135, 139, 141, 182, 184, 188-190, 194
Colloidal constituents:
of admixtures for concrete 67
of hydrated cement 111
of soils, *see* Chemical.
Colloy as concrete admixture 67, 68, 76, 84
Colombia, roads in 17
Compaction, consolidation:
of bituminous roads 55, 57-63, 216, 219-235
of concrete 11-15, 37, 148, 237-266, 270, 303, 307
of macadams as affected by subgrade soil 105
of soils, compactibility of soils 51, 57, 58, 90-93, 96, 98-102, 105, 124, 136, 181, 182, 184, 188-190, 192, 194, 217, 219, 221
Compressibility of soils, compression tests 89, 93, 94, 98-105, 107, 108, 117, 119, 120, 124, 128, 140, 142
Compressive strength of concrete 64-85, 109-116, 145, 149-166, 175-180, 237-239, 244-251, 269-280, 290-292
Concrete:
alkali (sulphate water) resistance 64-85, 109-116
batch size and mixing time, effect on 27E paver concrete 269-289, 292
dimensions of test specimens, effect on flexural strength 37-46

Page

Concrete—Continued.
durability 47, 152, 264–268
fluidity 11, 13, 15
frame construction, rigid 47, 268
frozen beams, modulus of rupture of 195–196
Highway Research Board, research 267, 268
hardening period, changes during 268
honeycombing 145, 152, 161–164, 167–180, 242, 254, 265
Joint Committee report 47
molded specimens as measures of quality of paving concrete 145, 180
paving concrete 145–180, 269–289, 292
placing methods, finishing methods, and effects of 11–15, 145–180, 237–266, 278, 281, 283, 288, 289, 303
pressure against form work as affected by vibration 11–15
ready-mixed concrete 47
strength—
relation to strength of cement 290–292
see also Compressive strength—Flexural strength.
see also headings beginning Cement, Concrete—*also* Uniformity—Workability.
Concrete bridge floor slabs:
materials and methods of placing, effects 237–266
"Concrete Cover Coat" 82
Concrete mixers 37, 147, 148, 240, 269–289, 292
Concrete mixes, concrete proportions:
designs and effects observed 11–15, 37, 38, 47, 64–85, 109–116, 145–180, 195, 196, 239, 267–269, 272–285, 289–291, 303
see also Proportioning.
Concrete mixing periods used and effects observed 147, 240, 269–289, 292
Concrete pavements:
cost data 280, 287–289, 292
design and construction methods 16, 17, 47, 145–150, 180, 267–289, 292
specifications 47, 180, 269, 275, 277, 283–285
see also headings beginning Subgrade—*also* Concrete—Cracks—Express highways.
Concrete reinforcement 47, 237, 238, 251–262, 267, 268
Concrete test specimens and test pavements:
fabrication and construction methods 11, 12, 37, 40, 64, 109, 112, 145–152, 195, 237–241, 247, 262, 269–272, 290, 303
Concrete testing apparatus, testing machines 11, 12, 37, 38, 40, 149–152, 195, 237–241, 243, 244, 247, 251, 252, 256, 257, 259, 262–264, 270–272, 290, 303–308; front cover of No. 10
Concrete tests, *see* Compressive strength—Concrete test specimens—Flexural strength—Pressure.
Concretions, *see* Oxides.
Condition survey data and r. to p. concerning:
bituminous road surfaces 49–63, 216, 227, 230–235
concrete pavements 116, 184, 185, 190–193
Congresses, road:
attitude concerning toll roads 9, 10
Consistency:
of cement, test results 39, 146, 238, 290
of concrete, *see* Concrete mixes.
of soils, consistency tests 92–94, 105, 108, 181–194
Consolidation, *see* Compaction.
Contraction, *see* Shrinkage.
Costs, *see* Bituminous treatment (of roads)—Concrete pavements—Drilling and blasting—Federal-aid roads—Operating costs—Tar roads—Toll roads.
Cover material for bituminous roads 51, 55, 60, 218, 222–226, 228, 229, 231
Cracks:
alligator hide cracking, checking, of roads 51–53, 56, 57, 98, 99, 222, 230–234
in bituminous road surfaces 51–53, 56–59, 222, 227, 230–234
in concrete slabs 98, 99, 105, 108, 140, 142–144, 183–185, 192–194, 238, 262, 267, 268
in macadam pavements 98, 99, 105
in soils 58, 59, 102, 104, 124, 189, 192, 194, 217, 218
Creep of retaining walls, r. to p 108
Crowns of oil-treated earth roads 57, 59, 63
Crumbling:
of mats of oil-treated roads 51, 52, 57, 60
of mortar in frozen concrete beams 265
of soils, crumb structure of soils 55, 56, 60, 102, 121, 122, 181, 184, 188–190, 203, 204
Crushed stone:
as admixture in subgrade soil 134
as aggregate—
in bituminous treatment of roads 217–235
in concrete, test results for stone concrete 37–46, 145–180, 237–266, 269, 270, 275, 277, 279, 280, 289
see also Macadam pavements.
Crushing, resistance to by soils 99, 139
Crushing strength of concrete, *see* Compressive strength.
Crusted soils:
crusted, crust-mulch soil structure 189
of earth road surfaces 55, 58, 59, 63
Cuban soils, r. to p 188
Culverts 186, 267
see also Alkali resistance.
Cumberland Road 2
Curing methods, curing periods:
for bituminous mixes, r 225
for concrete 37, 38, 40, 64–85, 109–116, 148–151, 160, 185, 195, 196, 240, 241, 244, 267, 270, 271, 290, 303
for mortar briquets 290, 291

Fees, *see* Registration—Toll roads.
Fillers for brick pavements 267
Fills, earth:
heights, critical 96–98, 183
hydraulic fills 99, 100, 142, 144
miscellaneous data 49, 53, 54, 56 (fn), 57, 59, 89, 93–100, 104, 105, 138, 143, 144, 183, 186, 187, 192–194, 267, 298
oil treatment 57, 59, 60
Films, motion picture 16–17
Finance, highway:
Highway Research Board research 268
see also Revenues, highway.
Fineness, fineness moduli:
test results for cements and fine aggregates 39, 64, 76, 109, 145, 146, 167, 238, 239, 290
Finishing of concrete:
methods and equipment used and effects observed 145–180, 237–266, 278, 281, 283, 288, 289, 303
Flexural strength of concrete 37–46, 145–180, 195–196, 237–262, 269–280, 289–292, 303–308
Flexure tests of concrete:
apparatus 38, 40, 150–152, 195, 241, 243, 256, 257, 270, 271, 290, 303–308; front cover of No. 10
standardization 37, 308
Flocculated soils, flocculation tests of soils 105, 108, 124, 127–130, 141, 144, 189, 192, 197, 198, 200
Flow:
of concrete, test methods and results 109, 149, 150, 152–154, 163
of soils, lateral flow, slides 89, 90, 93–99, 103–105, 108, 122, 123, 127–129, 136, 140, 142–144, 192, 193
Forest road construction 16
Form work, molds 11, 12, 37, 40, 147–150, 195, 217, 219, 220, 225, 231, 238–241, 247, 269–271, 303
Foundations, r. to p 116
Four-lane highways 3, 7, 8, 268
Freezing, frost action, as affecting:
concrete 152, 175, 195–196, 237, 264–267
oil-treated road surfaces 51, 62, 63
soil behavior (ice formation, heaving) 51, 89, 100–105, 116, 120, 127, 128, 137–144, 182–184, 187, 268
Friability of soils, friable soils 53, 55, 107, 181, 182, 184, 185, 190, 192, 194
Friction, internal:
in bituminous surfaces 95
in soils, skin friction in soils 57, 89, 95–98, 101, 103–105, 107, 108, 117, 123, 127, 128, 134
Funds:
highway funds, *see* Revenues, highway.
miscellaneous funds, allocations to 18, 20, 87, 236

G

Gasoline taxed, gasoline taxes 17, 86, 87, 236

and G. W. Davis—
materials and placing methods, effect on concrete bridge floor slabs, a.. 237–266
vibration, effect on pressure of concrete against form work, a.. 11–15
Temperature (s):
air temperature, various effects.. 11, 12, 15, 37, 54, 59, 62, 63, 182, 184, 185, 195, 196, 242, 243, 247–250, 264, 277
application temperatures for bituminous materials.. 50, 51, 54, 60, 61, 63, 221, 225
curing temperatures used for concrete specimens.. 37, 64, 65, 67–69, 72–78, 81–85, 195, 242, 243, 247–250, 270
drying temperatures used—
for concrete cores.. 152
in soil tests.. 198, 203–205
freezing temperatures for soil moisture.. 103, 104
of cement, effect of hot cement.. 267
of concrete during tests.. 37, 195, 196, 264
of suspending medium, of suspension, in hydrometer analyses of soils, temperature corrections.. 198–202, 208–215
of water as factor in movement of capillary moisture.. 101, 103
reaction to, by cements.. 66
testing temperatures for bituminous materials.. 50, 60, 61, 218–220
see also Freezing—Weather conditions.
Tennessee study:
effect of concrete breaking machine type.. 303–308
Tensile strength:
of cements, test results.. 39, 146, 238, 291, 292
of concrete, relation to strength of cement.. 290–292
Tension:
capillary tension in soils.. 98, 101, 102
in concrete in flexure tests.. 38, 151, 241, 243, 261, 303, 305
in embedded steel bar in bond tests.. 252, 254
surface tension of soil moisture.. 101, 102
see also Tensile strength.
Terracing as preventive of slides in cuts.. 98
Terzaghi tests and test data.. 89, 92–102, 104, 108, 116, 188
Tests and testing apparatus, *see* names of tests, names of materials tested, and names of kinds of apparatus.
Thawing:
as affecting ravelling of bituminous mats.. 51
of frozen concrete.. 152, 175, 195, 196, 237, 264–266
of soils, r., r. to p.. 103(fn), 104(fn), 116, 140, 141
Thee, T. C.:
production study (27E concrete pavers), a.. 269–289, 292
Thickness, depth:
of base courses in bituminous treatment experiments.. 217, 218
of bituminous mats.. 218, 222–226, 228, 235
see also Penetration.
of compressed soil layer, formula.. 100
of concrete beam, effect on flexural strength.. 37–46
of pavements.. 105, 140, 190, 216, 220, 269
see also Tires, motor vehicle (type).
Thoreen, R. C. (collab.):
soil constants, testing for determination of.. 197–207
Timber, creosoted.. 268
Time, *see* headings beginning Time—*also* Concrete mixing periods—Curing methods—Set—Vibrating time.
Time-compression data for soils.. 93, 99, 100
Time losses:
in concrete mixer operation.. 287–289
in highway-grading operations.. 294, 295, 298–300
Time-pressure relations for concrete.. 13–15
Tires, motor vehicle:
tire mileage as affected by overloading.. 30, 31
type, size, load, and condition as affecting impact reactions.. 21–36
wear, field methods of measuring.. 267
Toll roads and bridges.. 1–10, 17
Topsoil, *see* Sand-clay.
Tractive resistance, tractive effort (motor vehicle).. 268
Tractors, road.. 18–20, 49
Traffic capacity of roads.. 8, 16, 268
Traffic compaction, traffic kneading, of bituminous roads.. 49, 51, 55, 57–63, 216–235
Traffic control, traffic restrictions.. 3–6, 51, 60, 63, 268
Traffic lanes.. 3, 7, 8, 57, 60, 268
Traffic studies:
miscellaneous data.. 48, 49, 216, 217, 267, 268
mutilative and nonmutilative traffic, oil-treated roads.. 49, 51, 55, 57–61, 63
Traffic volumes.. 6, 8, 16
Trailers, motor vehicle.. 18–20, 217
Transcontinental highway routes, proposed.. 6
Transportation (general).. 17, 267, 268
Transverse strength, *see* Flexural strength—Rupture.
Trap rock as concrete aggregate.. 237, 239–258, 260–265, 269, 277
Trass as concrete admixture.. 67, 68, 75, 85
Trinidad, motion picture.. 17
Trucks, motor, *see* Motor trucks.
Truscon Waterproofing Paste.. 67, 68, 75, 85
Turnpikes.. 1–10

U

Uniformity:
of concrete.. 145, 152, 172, 173, 180, 269–281, 288, 289
Uniformity—Continued. Page
of soils—
r.. 51, 57, 63, 93
uniformity coefficients.. 117, 119, 136
see also Grading.
